

# ISACA China Hong Kong Chapter 2023 Annual Conference

16 June 2023 Friday  
9:00am - 5:00pm

Ballroom, Regal Hongkong Hotel, Causeway Bay

## Harnessing the Power of Technology for Effective Risk Management and Tackling Cybersecurity Threats

The rapid and ever-changing digital technologies provide many benefits and conveniences to the world. Still, they are also introducing new and sophisticated security challenges. The pandemic years have accelerated the hybrid mode of on-premises and cloud operations. At the same time, ransomware, phishing, malware, and identity system attacks have become ubiquitous. These complex security issues, compounded by the shortage of skillful security professionals, are concerns of the board of directors, senior management and working professionals.
